

## Lake Highland Ozone Water Treatment Plant

Orange County, Florida

**Client:**  
Orlando Utilities Commission

**Total Cost:**  
\$31,000,000

**Awards:**  
Recipient of Design Award by  
The American Institute of Architects

**Nature of Work:**

The Lake Highland Water Treatment Plant was designed for the Orlando Utilities Commission and serves as a prototype to establish architectural design standards for other future similar water treatment plants in the Orange County area.

The new 47,000 SF facility is part of a complex designed for the treatment and purification of water, utilizing ozone purification technology to produce potable water for the Greater Orlando area and surrounds.
